

## Dementia Cantab Mobile Update 05/11/2014

As of 5 November 2014, 11 practices have confirmed they would be interested in a Cantab Mobile license and four practices have confirmed they would not. There are still three that have not responded either way.

Those that have confirmed their interest in using the Cantab Mobile app have had nhs.net accounts set up and main contact details sent to Cambridge Cognition.

The table below shows each practice and their Dementia diagnosis rate for 2012/13, 2013/14 and the most recent figures as detailed in the October letter from NHS England. Of those that have declined the license, two are already meeting the target for March 2015.

Training will be delivered by Cambridge Cognition in one hour sessions. It is booked for 26<sup>th</sup> November and to date only one practice has signed up.

Practices will keep the CCG informed of their progress towards the 67% diagnosis rate via monthly emails – a communication will be sent out in the near future regarding this.
